

CORE COMPETENCIES

Core Statement:

Jifram is an American extruder of custom plastic parts and components. These quality plastic extrusions are expertly manufactured in the USA. From our website, you can request a quote for your custom extruded parts and components; or if time is of the essence, generate an instant quote using one of our over 250 stock tools. If you would rather discuss your project, don't hesitate to call us for a one-on-one consultation.

Core Competencies:

- We extrude profiles to your exact specifications.
- We collaborate with you on tooling design and material selection.
- We comply with all industry standards and tolerances.
- We extrude living hinges, flex hinges and profiles with flexible "grippers."
- Secondary operations include:
 - CNC routing
 - Mitering
 - Tape application
 - Holes & slots
 - Others available upon request

DIFFERENTIATORS

- Our comprehensive website provides all the resources you need to quickly source your plastic extruded parts and components. Or if you prefer, call us for one-on-one assistance.
- No minimum quantities required.
- We extrude EXTRA wide and tall, plastic extrusions up to 23" wide or 7" high.
- We co and tri-extrude.
- We extrude parts and components that look like metal.
- Low-cost tooling, quality parts and components delivered on time.
- From our website you can generate an instant quote using one of our over 250 stock tools.
